

## **SLATE STYLE PANEL**

A real *Slate Shingle*, is one of the most historically used roofing materials, in many areas of the world. It's *timeless elegance* provided the foundation for the *Slate Style Metal Roofing System's* creation. The attention to the *natural Slate's* random form and chiseled leading edges, has been emulated in the double embossed *metal shingle*. Having a larger single shingle panel allowed for more random forms to be replicated in this product. Giving your roof a natural look and *enhancing* your homes *architectural curb appeal*.

- Kynar 5000 Coated Rolled Steel Construction.
- Double Embossed Metal Stamping Process
- Floating Clip System
- Hidden Fastener System
- 52" x 12" Panel Dimension

## Hot Dipped Galvanized G90 Zinc Coating Steel Substrate Hot Dipped Galvanized Zinc Phosphate Pre-Treatment Exterior Grade Poyester Primer Low Gloss Low Sheen PVDF Polymer Coating Protective Seal Coat
